

Raja Talha Naveed

Senior Unity Game Developer

Email: naveedtalha6@gmail.com

Portfolio: talhanaveed.com | LinkedIn: [LinkedIn](#)

Professional Summary

Results-driven Unity Game Developer with 4.5+ years of experience building commercially successful mobile games across casual, hyper-casual, puzzle, FPS, RTS, and simulation genres. Specialized in gameplay programming, scalable game architecture, mobile optimization, and player-focused systems design using Unity (2D/3D) and C#.

Contributed to multiple published titles with millions of downloads, including FPS Commando Shooting (100M+ downloads) and Nail Salon Makeover Games (1M+ downloads). Experienced in collaborating with cross-functional teams to deliver polished mobile experiences under fast-paced production cycles.

Professional Experience

Unity Game Developer — Game District (8/2025 – Present)

- Developing casual and hyper-casual mobile games for one of MENA's leading mobile game publishers.
- Shipped Nail Salon Makeover Games achieving 1M+ downloads and a 4.4★ Play Store rating.
- Delivered Story Makeover: Art Games with 100K+ downloads and a 5.0★ rating.
- Developed Draw One Line: Brain Story, a puzzle-based single-stroke logic game focused on progression and engagement systems.
- Collaborated closely with art, product, and monetization teams to deliver polished games on aggressive timelines.
- Designed scalable gameplay systems and maintainable architectures using SOLID principles and clean coding practices.

Unity Developer — Hazel Mobile (10/2023 – 8/2025)

- Spearheaded development of FPS and puzzle games with engaging gameplay mechanics.
- Designed scalable architectures for mobile games supporting rapid feature integration.
- Collaborated with designers and artists to build responsive and engaging UI/UX systems.
- Performed optimization and profiling to ensure smooth gameplay performance across mobile devices.
- Delivered multiple Puzzle, and hyper-casual game projects.

Software Engineer — GeniTeams Solutions (01/2022 – 10/2023)

- Delivered multiple Unity projects across RTS, simulation, hyper-casual, and multiplayer genres.
- Designed gameplay systems and scalable architectures for both 2D and 3D mobile games. Optimized game performance through profiling, memory management, and rendering improvements.
- Integrated advanced technologies including AR, GPS tracking, and Arduino-based hardware systems.
- Led project planning, technical discussions, and cross-functional collaboration to ensure timely releases.
- Designed engaging progression systems and balanced game economies for long-term player retention.

Technical Skills

Languages & Engines: C#, Unity (2D/3D)

Game Development: Gameplay Programming, Game Architecture, Mobile Game Development
Programming Practices: OOP, SOLID Principles, Design Patterns, Clean Code

Optimization: Memory Management, Debugging, Profiling, GPU/CPU Optimization

Tools & Workflow: Git, SVN, Asana, Trello, Agile/Scrum

UI/UX: Responsive UI Systems, Mobile UX Design

Advanced Systems: Procedural Generation, Game Economy Design

Technologies: AR, GPS-Based Systems, Hardware Integration (Arduino)

Featured Projects

FPS Commando Shooting

FPS action game with 100M+ downloads on Google Play. Developed gameplay systems, combat mechanics, and optimization features for mobile devices.

Nail Salon Makeover Games

Casual beauty and ASMR game with 1M+ downloads and 4.4★ Play Store rating. Developed gameplay features, progression systems, and player engagement mechanics.

Solaverse

Web-based RTS blockchain game integrating NFTs and cryptocurrency systems. Designed economy systems, battleship mechanics, and player interaction features.

All other projects are on my website talhanaveed.com

Education

Bachelor of Science in Computer Science

COMSATS University Islamabad, Wah Campus (2016 – 2020)

CGPA: 3.71/4.00
