Professional Summary

Senior Unity Developer with 4.5+ years building mobile games that people actually play, mostly casual, hyper-casual, and puzzle titles, with some FPS, RTS, and simulation work mixed in. I care about clean gameplay code, architecture that doesn't fall apart when a new feature gets bolted on, and making sure the game actually runs well on a five-year-old Android phone.

I've worked on titles with real reach, including FPS Commando Shooting (100M+ downloads) and Nail Salon Makeover Games (1M+ downloads), and I'm just as comfortable wiring up monetization and analytics SDKs as I am building the core gameplay loop.

Professional Experience

Unity Game Developer, Game District

Aug 2025 – Present

- Build casual and hyper-casual mobile games for one of MENA's biggest mobile game publishers.
- Shipped **Nail Salon Makeover Games**, reaching 1M+ downloads and a 4.4★ rating on the Play Store.
- Delivered **Story Makeover: Art Games**, reaching 100K+ downloads and a 5.0★ rating.
- Built **Draw One Line: Brain Story**, a single-stroke puzzle game, with a focus on progression and keeping players hooked.
- Work closely with art, product, and monetization teams to hit aggressive ship dates without the game falling apart.
- Keep the codebase maintainable using SOLID principles, so new features don't break old ones.

Unity Developer, Hazel Mobile

Oct 2023 – Aug 2025

- Part of the team building FPS and puzzle titles, contributing gameplay mechanics alongside the rest of the group.
- Helped build architecture flexible enough that the team could add new features fast without breaking things.
- Worked closely with designers and artists on UI/UX that actually felt responsive to use.
- Profiled and optimized constantly to keep performance smooth across a wide range of devices.
- Shipped multiple puzzle and hyper-casual projects.

Software Engineer, GeniTeams Solutions

Jan 2022 – Oct 2023

- Delivered Unity projects across RTS, simulation, hyper-casual, and multiplayer genres.
- Built gameplay systems and architecture for 2D and 3D mobile games, and optimized performance through profiling, memory management, and rendering fixes.
- Integrated AR, GPS tracking, and even Arduino hardware into a few projects.
- Ran project planning and technical discussions, and worked across teams to hit release dates.
- Designed progression systems and game economies built for long-term retention, not just day-one numbers.

AI-Assisted Development

- On the side, building a full Unity 2D game using Claude AI agents connected through MCP servers, having them generate gameplay mechanics, VFX, and scenes, and chase down build errors as they come up.

Technical Skills

Languages & Engines: C#, Unity (2D/3D)

Game Development: Gameplay Programming, Game Architecture, Mobile Game Development

Monetization & Analytics: AdMob, AppLovin MAX, Firebase, GameAnalytics

Programming Practices: OOP, SOLID Principles, Design Patterns, Clean Code

Optimization: Memory Management, Debugging, Profiling, GPU/CPU Optimization

Tools & Workflow: Git, SVN, Asana, Trello, Agile/Scrum, Claude/AI Agents (MCP)

UI/UX: Responsive UI Systems, Mobile UX Design

Advanced Systems: Procedural Generation, Game Economy Design

Additional Technologies: AR, GPS-Based Systems, Hardware Integration (Arduino), Blockchain/NFT Systems

Featured Projects

Nail Salon Makeover Games

Casual beauty and ASMR game with 1M+ downloads and a 4.4★ rating on the Play Store. Built the gameplay features, progression systems, and the stuff that keeps players coming back.

Draw One Line: Brain Story

A single-stroke puzzle game built around progression and keeping players engaged.

FPS Commando Shooting

FPS action game, 100M+ downloads on Google Play. Built gameplay systems, combat mechanics, and optimization for mobile.

Solaverse

A web-based RTS blockchain game with NFTs and crypto systems. Designed the economy, battleship mechanics, and player interactions.

All other projects are on my website: talhanaveed.com

Education

Bachelor of Science in Computer Science, COMSATS University Islamabad, Wah Campus (2016 – 2020), CGPA: 3.71/4.00
